Professional Summary

AI & Data Science Engineering Candidate with hands-on expertise spanning Artificial Intelligence, Cybersecurity, and Game Development. Proven track record in architecting machine learning models for real-time threat detection (AI Adaptive Firewall), conducting web/network penetration testing (**Burp Suite**, **Nmap**), and building interactive digital experiences in **Unity 6.0 (C#)**. Backed by dual ethical hacking internships, **AWS Cloud Foundations** certification, and technical leadership as Team Lead for **Smart India Hackathon 2025** and **NASA Space Apps Challenge**.

Education

- Bachelor of Engineering (B.E.) – Artificial Intelligence and Data Science 2023 – 2027
  East West Institute of Technology (EWIT), Bengaluru
- KLE Independent PU College ,Bengaluru
  Senior Secondary Examination (12th Grade) – State Board 2022 – 2023
- Elite Public School, Bengaluru
  Secondary Examination (10th Grade) – ICSE Board 2020 – 2021

Technical Skills

- Programming Languages: Python, C#, Java, C, Dart, JavaScript
- Web Technologies & Frameworks: Django, Node.js, Bootstrap, HTML5, CSS3, MySQL, MongoDB
- Cybersecurity & Tools: Kali Linux, Burp Suite, Nmap, Metasploit, Wireshark, Vulnerability
- Game Dev & Cloud Platforms: Unity 6.0, Unity 5.x, AWS Cloud Foundations, Git, Linux CLI

Internships & Experience

Ethical Hacker Intern | ACMEGRADE Dec 2025 – Jun 2026

- Executed web and network vulnerability assessments using Burp Suite and Nmap to identify flaws like XSS, SQLi, and access control issues.
- Intercepted HTTP traffic and manually verified security risks, filtering out false positives to prioritize actionable vulnerabilities.
- Documented step-by-step Proof of Concepts (PoCs) and authored detailed remediation reports to assist development teams in patching security gaps.
- Collaborated daily with senior engineers to present risk findings, retest deployed patches, and verify system resolutions.

Ethical Hacker Intern | Jutrm Career Academy Mar 2026

- Completed hands-on penetration testing and vulnerability assessments across real-time network infrastructure projects.
- Analyzed system vulnerabilities and evaluated kernel-level security requirements to mitigate threat vectors.
- Successfully completed all technical security evaluations to earn an official Internship Certificate of Completion.

Academic Projects

Next-Generation Adaptive Firewall (AI Security) Ongoing / Present

- Architected an AI-driven security system using Python for real-time network anomaly detection and threat mitigation.
- Integrated machine learning models with packet-sniffing engines to detect DDoS attacks and zero-day threats.
- Automated kernel-level filtering rules to isolate and neutralize network threats without requiring human intervention.
- Replaced traditional static firewall models with adaptive ML defense to strengthen infrastructure security.

Game Complex Management System Mar 2025 – Jun 2025

- Developed a full-stack web application using Python, Django, and relational databases to manage game complex operations.
- Engineered real-time booking, inventory tracking, and member management modules to streamline daily workflows.
- Built robust backend APIs for data processing and system logic, improving data retrieval efficiency and data integrity.

Leadership & Hackathons

- Team Leader – Smart India Hackathon (SIH) 2025: Led institute team "EW ROOT CODERS" in developing digital solutions for real-world problem statements.
- Team Leader – NASA Space Apps Challenge 2025: Spearheaded cross-functional project planning, strategy evaluation, and technical execution.
- First Place Winner – District Mathematical Competition: Secured 1st rank for problem-solving speed and analytical capability.

Certifications & Virtual Experience

- AWS Academy Graduate – AWS Cloud Foundations Aug 2026
- Cybersecurity Operations Job Simulation – DataCom / Forage Jul 2026
- Interview Preparation Job Simulation – Ashurst Perkins Coie / Forage Jul 2026
- Cyber Job Simulation – Deloitte Australia / Forage Apr 2026
- Cybersecurity Security Analyst Job Simulation – Tata / Forage Apr 2026
- Amazon Cloud Architecture Job Simulation – Forage

Trainings & Certifications

- Unity Junior Programmer Pathway Certificate Jul 2026
- Unity 5.x & Unity 6.0 Game Development Training Dec 2025 – Jan 2026
- Advanced Java Programming Course Feb 2025 – May 2025
- Data Science Using Python Course Jul 2024 – Dec 2024
- Web Technologies & Web Programming Course Sep 2023 – Jun 2024
